"DOOR MODULE"

ABSTRACT

5 A door module, with a trim (9) on which practically all the component items are mounted or assembled, mechanical subassemblies of the lock and the window winder, wiring, etc. with a relative sliding movement between the mechanical subassemblies and the trim, facilitating assembly in the door. The trim includes openings for access to the fixing points for the different items in
10 the door inner liner, as well as a system of waterproofing against moisture.
